

Dear Parents,

I am very excited to inform you of a new Math program that I enrolled First grade into on the web. Included with this letter is a User ID and Password for your child. Each student is given their own ID and password. This way they can keep track of the progress as well compete with other classes in the United States. This was designed by the same maker of the 24 game. You may be familiar with this. Your child will begin on the lowest level and work his/her way up through the skill levels.

First In Math® is an easy-to-use, educational website that gets young people excited about math. Our specially-designed "games" develop and reinforce basic concepts, and are a great way for students to have fun while learning skills that will last a lifetime. Studies show that children who use the site on a regular basis experience significant improvement in math proficiency.

Content ranges from addition to algebra, and children proceed at their own pace—mastering problem-solving, computation, critical-thinking and pattern-recognition skills—as they advance through the levels of the program.

There is no software to install, games play on a PC or Mac, and updates are automatic. Each child receives his or her own, personal User ID and Password, and will be able to play the games 24/7 at school or at home. Explore the site with your child and discover a great learning experience!

The FIRST IN MATH® web site is for educational purposes only and contains no advertising messages.
